

POTTAPINJARA POORNA SAI NEHAL

+91-70325-42246 | poornasai113@gmail.com | [GitHub](#) | [LinkedIn](#) | SR University, Warangal

Summary

Computer Science undergraduate with strong foundations in Python, Java, SQL, Data Structures & Algorithms, and FullStack Development. Passionate about building AI-powered applications and scalable software solutions.

Education

B.Tech in Computer Science & Engineering — SR University CGPA: 8.15/10
Warangal, Telangana 2023–2027

Technical Skills

Languages: Python, Java, SQL
Web / Frameworks: HTML5, CSS3, JavaScript, React.js, Flask, Streamlit, REST APIs
ML / AI / Data: pandas, scikit-learn, Altair, NLP, Large Language Models (LLMs), Prompt Engineering, Data Visualization
Tools & Platforms: Git, GitHub, VS Code, Vercel, MySQL, OpenRouter API

Projects

- AI Placement Mentor – AI-Powered Resume Analyzer & Interview Preparation Platform – [Live Link](#)** 2026
Python | Flask | React.js | MySQL | OpenRouter API | NLP | Prompt Engineering
- Engineered a full-stack AI platform that analyzes resumes and generates ATS compatibility scores, reducing manual resume review effort by an estimated 40%.
 - Designed an NLP-driven analysis engine that extracts 15+ resume attributes (skills, projects, technologies, experience) to auto-generate 50+ tailored, technology-specific interview questions per candidate.
 - Deployed a production-ready React.js, Flask, and MySQL application with secure resume upload and an interactive dashboard, supporting concurrent multi-user sessions.
- Prompt2Program – AI Code Generator – [Live Link](#)** Mar 2024
Python | Streamlit | OpenRouter API | Generative AI
- Built an AI-powered web application that converts natural language prompts into functional code across multiple programming languages.
 - Integrated the OpenRouter API to deliver real-time code explanations and sample outputs, improving user comprehension of generated code.
 - Implemented secure, session-based API handling within a responsive Streamlit UI, ensuring reliable performance under concurrent use.
- IPL Merchandise E-Commerce Website – [Live Link](#)** Oct 2024
HTML | CSS | JavaScript
- Launched a responsive e-commerce website showcasing 30+ products across 10 IPL teams.
 - Engineered dynamic product filtering by team and category, cutting average product search time by roughly 30%.
 - Optimized layout and assets to ensure seamless performance across mobile, tablet, and desktop breakpoints.

Internships

- AI & Cloud Intern — Edunet Foundation (AICTE)** 2024
Data Science | Altair | Visualization
- Analyzed multiple real-world datasets and built 10+ interactive Altair visualizations to surface key trends for stakeholders.
 - Streamlined data preprocessing and exploratory analysis workflows, improving overall data quality and cutting processing time by roughly 25%.
- AI & ML Virtual Internship — AICTE** 2024
Python | pandas | scikit-learn
- Built and evaluated 5+ machine learning models for classification and regression tasks, benchmarking performance with accuracy and F1-score metrics.
 - Performed feature engineering and hyperparameter tuning, improving model accuracy by an estimated 10-15% over baseline.

Certifications

- Microsoft Azure AI-900 — Azure AI Fundamentals, Microsoft
